

Chesneys Shoreditch LS 5WS MK3 Wood Stove on Log Store

<https://www.calonyradref.co.uk/chesneys-shoreditch-ls-5ws-wood-stove-on-log-store>

Introducing the MK3 model of the Shoreditch 5 Log Store wood burner from Chesneys; just as beautiful as before, but with a lot more to offer from the combustion system.

Not only does the 5WS now have an impressive **heat output range of 3.5kW up to an impressive 7kW** (nominally rated at 4.9kW), but this comes with an incredible **efficiency rating of over 86%**!

With this, comes full EcoDesign compliance (the stove actually exceeds these requirements by a good margin), as well as DEFRA approval for use in smoke control zones all over the UK - and once again, the stove doesn't even come close to the upper limits for DEFRA approval; in fact it **produces just one tenth of the permitted emissions under DEFRA**, so with this stove you know you're getting a clean burn!

The redevelopment of this stove has added almost 50kg of weight; this goes some way to showing the level of additional craftsmanship gone into the redesign of the stove and its combustion system.
