

ACR Trinity Contemporary Wood Burning Stove

<https://www.calonyradref.co.uk/acr-trinity-contemporary-wood-burning-stove>

The Trinity-1 ECO is a compact, modern design wood burning stove with distinct and stylish squared edges.

The Trinity Eco is easy to operate and has a convenient ash removal system with an anti-spill lid to prevent any ashes blowing in the wind when emptying the ashpan.

The large glass panel is swept clean by a powerful airwash to give excellent views of the flames. Being DEFRA exempt means you can burn wood even in smoke controlled areas. It has a 5Kw output and is finished in matt black paint and is EcoDesign approved making it one of the cleanest stoves available.
