

Höfats GRAVITY Balanced Gimbal Tealight Candle Holder

<https://www.calonyradref.co.uk/float-gimbal-tealight-holder-lantern>

Designed with a balanced gimbal mount for holding tealight candles, these can be turned upside down without spilling wax, as the tealight candle will remain upright regardless of how the lantern is held. So to extinguish, you can simply turn the lantern upside down to starve the flame, with no mess or wax-spray from having to blow out the flame.

Why buy a GRAVITY lantern tealight holder?

- Seamless gimbal-mounted lantern
- Candle remains in upright position with gravity
- Simple & easy to light, as the lantern can be held horizontally while the tealight stays upright
- Easy to clean and safe to extinguish
- Turning upside down protects against leaves, water and dust
- Multi-functional: can be fitted with a hanging suspension kit, mounted upright on a ground pole, or simply set on its base on a table top.
