This two-piece set includes a shovel and brush, and a cross-shaped prop to allow them to sit nicely on your hearth at the fireside.

Almost every fireplace you will have seen would likely have had a fireside tool set, whether it be an upright set on a stand, or a hearth set like this one. But in either case, having fireside tools is more or less essential for anyone with a fireplace or stove fitted. Not just for functionality but also for decoration.

This set offers fantastic value for money, and is a great gift for the new stove-owner!
